

Moheb Nabil Special by Mervilde

We are now living in a high technical World and if internet did not exist I never “met” Mr.Moheb Nabil through Facebook a social networking service.

Moheb lives in Cairo,Egypt .Cairo is the capital of Egypt and the largest city in the Arab and African World.Cairo is also nicknamed “The city of the Thousand minarets”

Moheb specialized on crests and Japanese crests birds we seldom see in Europe.

Because I always liked the Rares I was very happy that Moheb cooperate to make this article. Thank you Moheb to let us see those wonderful crests.

Moheb Nabil
Egypt—1982 at Zoo
Later I started breeding birds
My start in breeding birds, 6 years old

He started breeding budgies since he was 6 years old and specialized in Crested and english budgies. About 6 years ago he obtained 3 Japanese crested birds (one cock and 2 hens). Out of these birds he got al lot of new colours. For the breeding he used the following rules:

- 1- mating the cock to the 2 hens.
- 2 - mating the good new chiks to each other.
- 3- mating the cock to normals hens , full crested hens and cross bred birds (english and normals) with various colours .
- 4-mating Japanese crested hens to normals or full crested males with various colours.
- 5-mating the 2 Japanese crested hens to the japanese new males obtained from previous clutches.

-Then he was selecting the birds with high blood line (full circular crest on head, large back frill and feathers of the Japanese on both wings) then mated the selected to each other where te offsprings were more high in all the charcteristics of Japanese crested.

-Also he used cross bred birds (english and normals) as an intermediate stage in mating with his japanese crested to produce more good sizes in clutches .

-His next step will be using a good quality english hen and mate her to a top japanese crested male and see the new results
